Service - our code of success Construction Philosophy

Business Process & Integration

12 NALIKA truly tailors its work to fit the technical features, quality aspects, budget availability and scheduling required specifically by our customers by integrating the extraordinary engineering skills with the unparalleled management techniques through the following major processes.

Planning

Planning process is a very important stage, which defines basic direction and steps in implementing a project. We take on the overall and systematic planning by initiating in-depth discussion with and collecting all related documents from our customers to establish the mutual understanding and accurate realistic and expectation at the early stage for a well-planned project.

Design

Our designs are centered on safety, economy, on-time execution, and customer's practical operation, and these follow the international standards and Thailand's local criteria. TEAM VISION professionally develops and fully utilizes its customized Computer Aided Design & Drafting and Engineering Reference Database system to generate sophisticated design blueprints and construction drawing together with material specifications for procurement and construction.

Project management

Our key staff have extensive experience in providing Project management service rang from feasibility study,planning,design,construction bidding advise, construction supervision, commissioning and operator training for infrastructure, building and factory project.

Mechanical Engineering

The company's services also include construction and field engineering for the mechanical work with emphasis on both industrial plants and modernization projects, in which the result can be measured by enhanced efficiency and upgraded performance. With highly qualified engineers, capable supervisors, and skilled technical staff engaged in every phase of operation, we systematically launch a project with circumspect planning and ensure timely co-ordination with every involved parties to make sure the construction will be done orderly and completed within the agreed timeframe.

Electrical Engineering

12 NALIKA 'S primary strength is its distinguished specialization in detailed engineering and construction of electrical works for power utilities and distribution facilities in various kinds of industrial plants. Our engineering teams extensively gain the competitive edges from the experience cultivated from hundreds of projects we did nationwide and these knowledge, in turn, have been accumulated and transferred into our comprehensive databases. As a result, we are confident to fulfill our customers' requirements with highest efficiency, economy, and timely execution.
